

26M MULTIPURPOSE CATAMARAN

The VEKA Multipurpose Catamaran represent a series of high speed crafts. The 26 m Cat is the new member in the line. With its increased size, the 26m Catamaran can operate in more challenging conditions, further offshore.

With this highly innovative support vessel for the offshore industry, VEKA Group has developed a very powerful workboat, specialized in transporting technical personnel and working material to and from wind farms.

A unique and specialized ship with a wide range of technical innovations developed for a more efficient maintenance of wind turbines. The hull shape provides high stability in heavy weather and pushes the boundaries of the ship. The strong and lightweight aluminum construction ensures safety, a high speed, and high performance of this catamaran.

TECHNICAL SPECIFICATIONS

Principal Dimensions

Length overall	: 25.50 m
Length waterline	: 24.28 m
Beam moulded	: 9.00 m
Draft	: 2.00 m
Loaded draft	: 4.00 m

Capacities

Passengers / crew	: 12 / 3
Cargo (containers)	: 2x 20 ft. 1x 10 ft.
Deck cargo	: 15 ton
Max deck load	: 1.5 ton/m ²
Fuel	: 12.000 L

Power and Propulsion

Main engines	: 2x 1000 kW
Propulsion	: 2x Propeller
Range	: 700 - 800 NM

Design	: VEKA
Classification	: GL

All specifications and general arrangements as provided in this document are provisional.
