

INLAND HOPPER BARGE

With our roots in Werkendam, VEKA is located at the center of developments in the modern inland shipping market. Since 1988 we have gained extensive knowledge in the development and construction of a wide range of inland (multipurpose) cargo- and containerships, providing appropriate solutions for your specific transport demands.

The VEKA hopper barge is a self-propelled vessel that assists in a wide range of dredging operations. After long Dutch tradition, every detail of the vessel's design is optimized. In addition, the vessel can be equipped with cargo hatches to handle a wider variety of bulk- en general cargos.

TECHNICAL SPECIFICATIONS

Principal dimensions

Length overall	: 110.00 m
Beam	: 11.45 m
Depth	: 4.40 m
Max draft	: 4.38m
Tonnage	: 3668 tons
Hold / Hopper capacity	: 2250 m ³

Power and Propulsion

Main engines and equipment based on desired specifications.

Classification : Lloyd's Reg.

All specifications and general arrangements as provided in this document are provisional.
