

INLAND TANKER 135m x 15m

With our roots in Werkendam, VEKA is located at the center of developments in the modern inland shipping market. Since 1988 we have gained extensive knowledge in the development and construction of a wide range of inland tankers.

Also, with VEKA Piping and Industry we are now leading in the production of complete piping systems for bunker and chemical inland tankers in Europe.

The spacious 135 x 15 meter Inland Tanker is the preferred choice for large bunker handlings, and the transport of large liquid cargos. With its large tank capacities, the vessel can bunker even the biggest of ships in one handling, and economically transport large cargos to the major European inland ports.

A-13

TECHNICAL SPECIFICATIONS

Principal Dimensions

Length overall	: 135.00 m
Beam	: 15.00 m
Depth	: 5.39 m
Max draft	: 4.30 m
Tonnage	: 6,228 tons
Tank capacity	: 6,800 m ³
Number of tanks	: 18 tanks

Power and Propulsion

Main engines and equipment based on desired specifications.

Classification : Lloyd's Reg.

All specifications and general arrangements as provided in this document are provisional.
